

The world famous Drum, a yachting icon!

Drum is a 78-foot Maxi racing yacht, designed by the renowned naval architect Ron Holland for her first owner, pop idol Simon Le Bon of Duran Duran. It competed in the 1985 Whitbread Round the World Race, finishing a commendable third. The well-known Scottish entrepreneur Sir Arnold Clark acquired her thereafter, and successfully raced her at Isle of Wight, Ireland and Scotland.

Experience the extraordinary

Provide clients with the ultimate in corporate hospitality, or family and friends with an unforgettable, once-in-a-lifetime experience. During the charter, become part of the crew and get the full Drum experience. Under instruction from the skipper, you will man the winches, trim the 350m² of sail and take the helm of this sleek 40-ton racing yacht, which cuts through the water like a hot knife through butter. Catering is provided on all charters, so you can choose from our online menu and (weather permitting) enjoy your delicious meal 'al fresco' on deck.

Sailing area

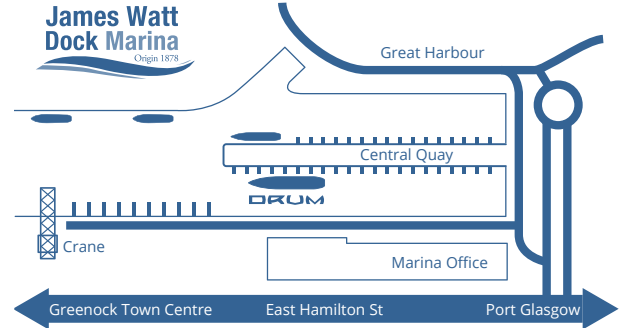

Drum sails out of James Watt Dock Marina, Greenock, which makes her ideally placed for cruising the beautiful waters of the Clyde Estuary. Alternatively, if you fancy a longer trip, the inviting waters and scenery off the magnificent West Coast of Scotland are within easy reach, as is Northern Ireland. Wherever you sail, you'll have the opportunity to spot a huge range of wildlife, including porpoises, seals and basking sharks, and a wide variety of seabirds.

Where to find us

The Marina is conveniently located and easily accessible by public transport: it's just 15 minutes drive from Glasgow Airport and the train station is only a 5 minute walk away. Should overnight accommodation be required, Premier Inn is a short walk from the Marina.
